SPRING 2

**Student Council**  
Inspire and Achieve  
Building Bright Futures Together

Since the last time we came to see you .....

- We launched to the whole school through a series of assemblies
- Are busy recruiting 48 Tutor Reps
  - Met with the Parent Ambassador and Anger to Action groups
- Designed a new Bike Shed sign
  - Busy on our next project

# Just before we go onto the new projects ....

We are still working on these current ones that are ongoing;

Reading-

- New selection of comic books
- Campaigning to make reading more visible

A2B-

- Accessibility
- The crowding of the office
- Student Council tutor representatives

**Our aim is to join forces with the Anger to Action group and reduce the use of polystyrene plates and bowls as well as plastic cutlery in our school canteen.**

**We would also like to consider replacing the sauce sachets which are very bad for the environment.**

## **Our Action Plan so far has been ...**

- We have met with representatives from Anger to Action and agreed to work alongside each other in this task
- We have all been away and researched the costings of alternative products which we would like to meet Mr Falkner and Mr Campbell with to discuss their viability.
- We have arranged to meet with the RADECO group to invite them to work on the project as well.

## Our Next Steps

- Following our meetings here and with Mr Falkner and Mr Campbell we would ideally like to try and identify some alternative products. Once we have these we would like to use the Tutor Reps to publicise to the rest of the students.
